

## AASL's L4L Sample School Librarian Performance and Evaluation System

### INTRODUCTION

This system is based on a continuous cycle of assessment and evaluation within four domains of teaching responsibility presented by Charlotte Danielson in the first and second editions of *Enhancing Professional Practice: A Framework for Teaching* (1996, 2007) and has been developed by the Londonderry (NH) School District for L4L based on the work of Charlotte Danielson which is used with her permission and posts as open content with attribution to Danielson, Londonderry School District and L4L.

Danielson's four domains are: Planning and Preparation, Classroom Environment, Instruction, and Professional Responsibilities. The L4L evaluation system parallels her domains, but replaces her second domain with Library Environment. Many of the elements and the components in this domain parallel Danielson's; however, when necessary, they have been adapted to the role of the school librarian when it differs from the teacher's role. All elements represent principles of best practice in teaching and school librarianship. Each domain has specific, measurable components to evaluate performance. As a result of self-assessment and conferencing with evaluators, the school librarian's professional development goals reflect and align with the elements of these evaluative criteria.

### *Summary of the Domains*

#### **Domain 1: Planning and Preparation**

Both directly and indirectly, the school librarian plays an important role in planning for instruction. Supporting instruction requires having the necessary resources available; achieving availability requires knowledge of curriculum and knowledge of students. The school librarian is involved in ensuring that units of instruction help students develop and practice:

- information literacy skills (the ability to define the task/problem/need for information; develop a search strategy; locate, evaluate, and use information effectively)
- the research process
- media and digital literacy and technology skills

This integration requires that school librarians collaborate with teachers in planning, implementing, and assessing some units of study.

#### **Domain 2: The Library Environment**

In this domain many elements and components are similar to those of the classroom environment. The components of managing classroom procedures and organizing the learning environment have been adapted to meet specific needs within the library. Traffic flow - the ability to move freely and easily within a space - and the importance of self-directed use are important concepts to consider in the organization of the library as a flexible learning environment capable of simultaneously supporting a variety of groups and activities.

### **Domain 3: Instruction**

The components in this domain have been adapted to show how the school librarian is involved in instruction. The research process, as well as information, media, and digital literacy and technology skills are emphasized when working with classes, small groups, or individuals. Additionally, much one-on-one teaching occurs in the library.

### **Domain 4: Professional Responsibilities**

Within this domain, components dealing with reflection, communication, contributing to the school and school district, and growing professionally are much the same as the teachers' components documented by Danielson. Included in the L4L sample evaluation system are additional components unique to librarianship and professional responsibilities involving the management of the library:

- developing and administering the budget
- keeping accurate records regarding collection, circulation, and use
- analyzing data for planning and decision making
- supervising staff
- developing and maintaining a collection of resources

Additionally, enhancement of professional knowledge in the specialty and service to the profession are in this domain.

## Addendum A

### Library Bill of Rights

The American Library Association affirms that all libraries are forums for information and ideas, and that the following basic policies should guide their services.

- I. Books and other library resources should be provided for the interest, information, and enlightenment of all people of the community the library serves. Materials should not be excluded because of the origin, background, or views of those contributing to their creation.
- II. Libraries should provide materials and information presenting all points of view on current and historical issues. Materials should not be proscribed or removed because of partisan or doctrinal disapproval.
- III. Libraries should challenge censorship in the fulfillment of their responsibility to provide information and enlightenment.
- IV. Libraries should cooperate with all persons and groups concerned with resisting abridgment of free expression and free access to ideas.
- V. A person's right to use a library should not be denied or abridged because of origin, age, background, or views.
- VI. Libraries which make exhibit spaces and meeting rooms available to the public they serve should make such facilities available on an equitable basis, regardless of the beliefs or affiliations of individuals or groups requesting their use.

Adopted June 18, 1948.  
Amended February 2, 1961, and January 23, 1980,  
inclusion of "age" reaffirmed January 23, 1996,

## **Addendum B**

### **Access to Resources and Services in the School Library Media Program**

#### ***An Interpretation of the LIBRARY BILL OF RIGHTS***

The school library media program plays a unique role in promoting intellectual freedom. It serves as a point of voluntary access to information and ideas and as a learning laboratory for students as they acquire critical thinking and problem-solving skills needed in a pluralistic society. Although the educational level and program of the school necessarily shapes the resources and services of a school library media program, the principles of the [Library Bill of Rights](#) apply equally to all libraries, including school library media programs.

School library media specialists assume a leadership role in promoting the principles of intellectual freedom within the school by providing resources and services that create and sustain an atmosphere of free inquiry. School library media specialists work closely with teachers to integrate instructional activities in classroom units designed to equip students to locate, evaluate, and use a broad range of ideas effectively. Through resources, programming, and educational processes, students and teachers experience the free and robust debate characteristic of a democratic society.

School library media specialists cooperate with other individuals in building collections of resources appropriate to the needs and to the developmental and maturity levels of students. These collections provide resources that support the mission of the school district and are consistent with its philosophy, goals, and objectives. Resources in school library media collections are an integral component of the curriculum and represent diverse points of view on both current and historical issues. These resources include materials that support the intellectual growth, personal development, individual interests, and recreational needs of students.

While English is, by history and tradition, the customary language of the United States, the languages in use in any given community may vary. Schools serving communities in which other languages are used make efforts to accommodate the needs of students for whom English is a second language. To support these efforts, and to ensure equal access to resources and services, the school library media program provides resources that reflect the linguistic pluralism of the community.

Members of the school community involved in the collection development process employ educational criteria to select resources unfettered by their personal, political, social, or religious views. Students and educators served by the school library media program have access to resources and services free of constraints resulting from personal, partisan, or doctrinal disapproval. School library media specialists resist efforts by individuals or groups to define what is appropriate for all students or teachers to read, view, hear, or access via electronic means.

Major barriers between students and resources include but are not limited to imposing age or grade level restrictions on the use of resources; limiting the use of interlibrary loan and access to electronic information; charging fees for information in specific formats; requiring permission from parents or teachers; establishing restricted shelves or closed collections; and labeling. Policies, procedures, and rules related to the use of resources and services support free and open access to information.

The school board adopts policies that guarantee students access to a broad range of ideas. These include policies on collection development and procedures for the review of resources about which concerns have been raised. Such policies, developed by persons in the school community, provide for a timely and fair hearing and assure that procedures are applied equitably to all expressions of concern. School library media specialists implement district policies and procedures in the school.

Adopted July 2, 1986; amended January 10, 1990; July 12, 2000; January 19, 2005, by the ALA Council.

## Addendum C

### Code of Ethics of the American Library Association

As members of the American Library Association, we recognize the importance of codifying and making known to the profession and to the general public the ethical principles that guide the work of librarians, other professionals providing information services, library trustees and library staffs.

Ethical dilemmas occur when values are in conflict. The American Library Association Code of Ethics states the values to which we are committed, and embodies the ethical responsibilities of the profession in this changing information environment.

We significantly influence or control the selection, organization, preservation, and dissemination of information. In a political system grounded in an informed citizenry, we are members of a profession explicitly committed to intellectual freedom and the freedom of access to information. We have a special obligation to ensure the free flow of information and ideas to present and future generations.

The principles of this Code are expressed in broad statements to guide ethical decision making. These statements provide a framework; they cannot and do not dictate conduct to cover particular situations.

- I. **We provide the highest level of service to all library users through appropriate and usefully organized resources; equitable service policies; equitable access; and accurate, unbiased, and courteous responses to all requests.**
- II. **We uphold the principles of intellectual freedom and resist all efforts to censor library resources.**
- III. **We protect each library user's right to privacy and confidentiality with respect to information sought or received and resources consulted, borrowed, acquired or transmitted.**
- IV. **We recognize and respect intellectual property rights.**
- V. **We treat co-workers and other colleagues with respect, fairness and good faith, and advocate conditions of employment that safeguard the rights and welfare of all employees of our institutions.**
- VI. **We do not advance private interests at the expense of library users, colleagues, or our employing institutions.**
- VII. **We distinguish between our personal convictions and professional duties and do not allow our personal beliefs to interfere with fair representation of the aims of our institutions or the provision of access to their information resources.**
- VIII. **We strive for excellence in the profession by maintaining and enhancing our own knowledge and skills, by encouraging the professional development of co-workers, and by fostering the aspirations of potential members of the profession.**
